

NITHIN KUMAR K R

Data Engineer

Data Engineer with 3+ years of experience in building scalable ETL/ELT pipelines, data analysis, and reporting. Proficient in Python, MySQL, PySpark, Airflow, Airbyte, Apache Iceberg, AWS, Metabase, Splunk, and Data Science tools for driving data-driven solutions.

WORK EXPERIENCE

Data Engineer

Straive - Visa

08/2024 - Present

Bengaluru

Achievements/Tasks

- Built scalable ETL pipelines using Airflow and PySpark to automate data ingestion, transformation, and loading from diverse sources, significantly improving data pipeline efficiency.
- Designed and implemented Delta Lake architecture to optimize data lake performance, support data versioning, and enable reliable, structured data workflows.
- Integrated Apache Iceberg and Snowflake for modern data warehousing, leveraging features like schema evolution and partitioning for highperformance analytics at scale.
- Performed advanced exploratory data analysis (EDA) using Python (Pandas, NumPy, Seaborn, Matplotlib) to extract actionable insights from large financial datasets.
- Developed Splunk dashboards and SPL queries to monitor logs, detect anomalies, and optimize system performance, enhancing observability and operational awareness.
- Contributed to the implementation of a machine learning algorithm to develop a predictive model.

Data Engineer

FinFlux - An M2P Fintech

08/2021 - 07/2024

Achievements/Tasks

- Led a high-performing data reporting team, developing customized Python and SQL reports tailored to client specifications, improving reporting accuracy and turnaround time.
- Built and deployed interactive dashboards using Metabase, enabling business leaders to monitor key metrics like revenue, sales, and expenses in real-time for data-driven decisions.
- Designed and orchestrated scalable ETL and ELT pipelines using Airbyte and AWS Glue, automating data movement across systems and increasing pipeline reliability while reducing manual overhead.
- Led the development of a comprehensive leadership dashboard, delivering daily insights on sales, revenue, spending, and various metrics to NBFC/Bank leadership and owners.
- Proficiently leveraged various AWS services, including ETL Glue jobs, Secret Manager, Crawlers, Key Management Services (KMS), S3 buckets, and Data Catalogs, to design and implement robust and scalable data pipelines.
- Delivered leadership dashboards for NBFCs and banks, providing daily visibility into operational performance and financial KPIs to support strategic executive decision-making.
