

WORK EXPERIENCE

Data Analyst

Straive - Visa

08/2024 - Present

Bengaluru

Achievements/Tasks

- Led a data Analyst team proficient in Python and SQL, conducting extensive data mining and analysis on large datasets, yielding actionable insights and driving informed decision-making through advanced analytics techniques.
- Performed statistical analysis using Python libraries such as NumPy, Pandas, Seaborn, and Matplotlib for data-driven insights.
- Worked with large datasets using PySpark, performing data extraction, transformation, and manipulation to generate meaningful insights through data visualizations.
- Developed and optimized Splunk alerts, dashboards, and reports to enhance monitoring and operational insights.
- Designed and fine-tuned SPL queries for efficient log analysis, anomaly detection, and performance optimization.
- Collaborated closely with banks to develop and automate reports, implementing triggers for automated reporting when specific conditions are met.
- Utilized Python to construct a comprehensive data pipeline for exploratory data analysis (EDA), employing Delta Lake architecture to create optimized Gold, Silver, and Bronze tables, facilitating efficient data processing and analysis workflows.
- Contributed to the implementation of a machine learning algorithm to develop a predictive model aimed at detecting outliers in financial transactions, thereby enhancing fraud detection capabilities and proactively preventing fraudulent activities.

Data Analyst

FinFlux - An M2P Fintech

08/2021 - 07/2024

Achievements/Tasks

- Led a data reporting team specializing in Python, SQL, developing tailored reports according to client requirements.
- Developed interactive data visualizations using Metabase to effectively communicate key insights to stakeholders.
- Collaborated closely with project managers, product teams, and clients to define the architectural framework of the reporting and data analysis teams, ensuring alignment with project objectives and client needs, fostering efficient communication and synergy across departments.
- Led the development of a comprehensive leadership dashboard, delivering daily insights on sales, revenue, spending, and various metrics to NBFC/Bank leadership and owners.
- Having experience in Airbyte for orchestrating extract, transform, and load (ETL) processes, ensuring seamless data extraction, transformation, and loading operations within a data pipeline framework .
- Proficiently leveraged various AWS services, including ETL Glue jobs, Secret Manager, Crawlers, Key Management Services (KMS), S3 buckets, and Data Catalogs, to design and implement robust and scalable data pipelines.
- Providing stakeholders with actionable insights derived from historical data analysis, I facilitate informed decision-making and strategic planning. Additionally, I offer recommendations for future improvements based on data-driven findings, fostering continuous optimization and growth.

EDUCATION

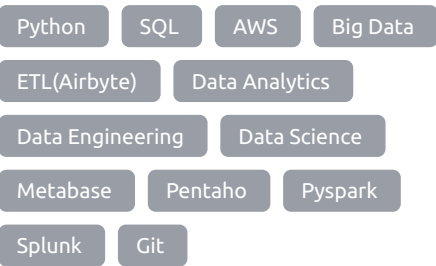

Engineering

University of Visvesvaraya College of Engineering

08/2017 - 08/2021

73.41%

SKILLS

CERTIFICATES

Foundation of Data science from Padhai.

Python from Simplilearn.

Metabase Training from Simplilearn

SKILLS AND ABILITIES
